

Date	18 July 2026
Team ID	XXXXXX
Project Name	Smart Lender: Loan Eligibility Prediction System
Maximum Marks	5 Marks

Problem-Solution Fit Canvas:

Use the framework below to ensure your proposed solution accurately addresses the root causes, behaviors, and limitations of your target audience. Fill out the canvas in the respective boxes just like the original visual template.

1. CUSTOMER SEGMENT(S) [CS] - Financial institution loan officers & underwriters - Retail credit risk managers - Individual retail loan applicants seeking instant pre-qualification verification	6. CUSTOMER LIMITATIONS [CL] <i>EG. BUDGET, DEVICES</i> - Lack of extensive technical / machine learning expertise among operational bank staff - High reliance on legacy banking infrastructure with limited compute bandwidth	5. AVAILABLE SOLUTIONS [AS] <i>PROS & CONS</i> - Manual traditional underwriting: + High clinical accuracy - Extremely time-consuming - Rule-based static scoring engines: + Low runtime computation cost - Unable to adapt to nonlinear risk correlations
2. PROBLEMS / PAINS [PR] <i>+ ITS FREQUENCY</i> - Long loan approval turnaround windows causing applicant attrition (High Frequency) - Hidden defaults and bad-debt accumulation from flawed risk parameters (Moderate Frequency)	9. PROBLEM ROOT / CAUSE [RC] - Disparate, siloed borrower profiles spread across unorganized data structures - Rigid threshold frameworks that fail to cross-analyze intersecting applicant risk attributes simultaneously	7. BEHAVIOR [BE] <i>+ ITS INTENSITY</i> - Applicants repeatedly look for alternative, fast-digital finance alternatives (High Intensity) - Bank officers manually bypass slow segments or rush approvals under stress (Moderate Intensity)
3. TRIGGERS TO ACT [TR] - Spike in quarterly non-performing assets (NPAs) - Competitive pressure from agile, modern digital FinTech platforms offering instantaneous answers	10. YOUR SOLUTION [SL] Smart Lender System: A high-accuracy ML classification platform (XGBoost/Random Forest) integrated with an intuitive Flask interface for immediate risk scoring	8. CHANNELS OF BEHAVIOR [CH] <i>ONLINE</i> Cloud web portals, mobile application submission screens, digital API scoring endpoints

	and interactive batch processing.	
4. EMOTIONS [EM] <i>BEFORE / AFTER</i> • Before: Anxious, frustrated by endless documentation delays, uncertain of criteria status. • After: Confident, satisfied, reassured by transparency and rapid automated processing metrics.	• Serialized multi-model automated comparative training suites ensures peak predictive accuracy at runtime.	8. CHANNELS OF BEHAVIOR [CH] <i>OFFLINE</i> • In-branch verification consultations, physical documentation drop boxes, customer service desk workflows
