

Coding & Solution

Date	18 July 2026
Team ID	XXXXXX
Project Name	Smart Lender: Loan Eligibility Prediction System
Maximum Marks	5 Marks

Solution Summary

Field	Details
Repository Link / URL	https://github.com/NagaLakshmiAdapala/SmartLender-AI.git
Programming Language(s)	Python
Framework(s) Used	Flask, Scikit-Learn, XGBoost
Key Features Implemented	• Real-time single applicant eligibility checking • Batch loan evaluation using CSV data upload • Preprocessing pipeline (Cleaning, Mode imputation, Label encoding) • Model validation and performance tracking metrics
Pending / Incomplete Features	None (All core application modules and pipelines are fully functional)
Setup / Run Instructions	1. Clone the repository and navigate to the root directory. 2. Install required dependencies using: <code>pip install -r requirements.txt</code> 3. Start the application backend and server layer by executing: <code>python app.py</code> 4. Open your browser and access the predictive environment at <code>http://localhost:5000</code>

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	Yes
